

Y5MT Curriculum Review - Spring 2024

English

Our class have been working hard to improve our reading and writing skills in English. We have used the two books to inspire our writing and are becoming much more confident to include subordinate conjunctions and fronted adverbials into our creative independent work.

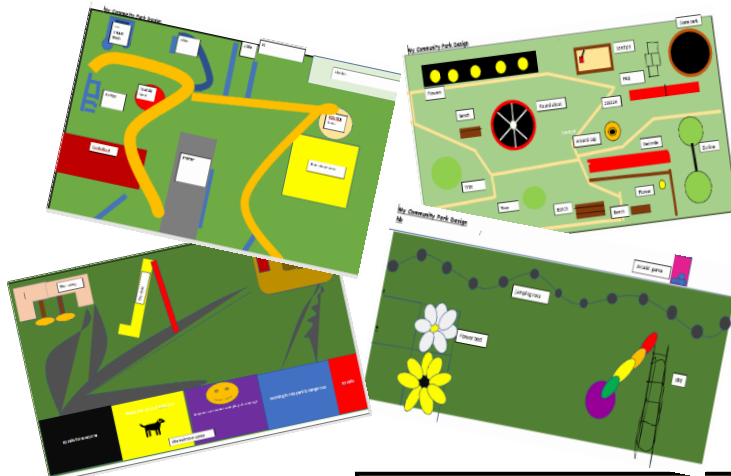

PE - Tees Valley Dance

Y5MT took part in the Tees Valley Dance. Over a period of 4 weeks, the children learnt a dance routine to a Dua Lipa song. We had a great time performing it especially when we could add in our own dance moves.

Art - Typogrphay

In Art we have been finding out about 'typography' and how artists use it in their creative pieces. We studied Louise Fili who is an artist who uses typography in her designs of posters and packaging. We created our own 3-D maps that used typography to label places and features of the map.

Computing - Designing a park

In Computing Y5MT have been learning how to use the draw tools in Word. We have learnt how to draw objects, resize them, group them and order them so one object can lay on top of another object. The children then used their skills to design their ideal community park.

Science - Properties of Materials

In Science we have been investigating further the properties of solids, liquids and gases. We have completed a number of comparative investigations including one which found out which kitchen-based solids dissolve in water.
